

# SPACE OPERATIONS FOR THE MODERN AGE

RE-INVENTING MISSION CONTROL

## PLAN YOUR NEXT MISSION WITH SABER PRECISION

Proven mission control software and operations designed to propel your organization into the future. Saber builds cutting-edge technology for both space and Earth-based applications. We reduce barriers to space, reduce mission cost, improve efficiency, and streamline the way we live and work in space.

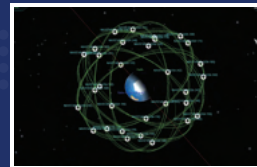

### OPERATIONS SOFTWARE

Powerful, game-inspired interfaces give you live data-feeds, rich graphics and world-class system diagnostics of your mission and hardware.

### MISSION SUPPORT

Advanced tools for streaming operations of satellites. Lean operations means reliable, responsive service.

### PREDICTIVE ANALYTICS

Saber has World-class ability to analyze complex systems and their deep workings, providing time-invariant models for your organization.
